**Professional Summary**

Software Engineer with over 9 years of experience designing, developing, and maintaining high-performance backend systems and data pipelines. Deep expertise in C#/.NET, complemented by 3 years of hands-on experience modernizing a Java-based application that uses Docker and Kubernetes. I'm passionate about building robust, scalable software solutions. Author of the technical blog "Puzzled by C# Code," exploring advanced topics in the .NET ecosystem.

**Skills**

- **Languages:** C#, Java, SQL, Go
- **Frameworks & Runtimes:** .NET Framework, .NET Core, Spring Framework, Spring Data JPA, WPF, WinForms
- **Cloud & DevOps:** Docker, Kubernetes, CI/CD, Git, Bitbucket, GitLab, AWS, Jenkins
- **Databases:** PostgreSQL, Oracle, SQL Server, ClickHouse, HP Vertica, SQL Lite
- **Frontend:** HTML, JavaScript, Angular, Qwik

**Professional Experience**

Keysight Technologies Inc. | Remote | Feb 2017 – Present

Software Engineer

- Spearheaded the modernization of the Appstack software suite's backend by migrating the data access layer from Hibernate to the Spring Data JPA standard, improving performance, developer efficiency, and security.
- Engineered and maintained complex business rules and backend services for the Xynergy product using C#, directly impacting core product functionality for a global customer base.
- Built robust ETL pipelines to process and load large-scale customer data into HP Vertica and Oracle databases, ensuring data integrity and availability for analytics.

- Designed and developed critical WPF/WinForms monitoring applications that provided real-time insights into backend system health and database performance, reducing troubleshooting time for production issues.
- Supported and monitored multiple customer production environments, demonstrating strong operational ownership and a commitment to high-availability systems.

Anite Plc. (Acquired by Keysight) | Chantilly, VA | Oct 2014 – Jan 2017

Software Engineer

- Led the end-to-end development of backend services, business rules, and UI components, successfully delivering custom solutions for key clients.
- Developed a versatile file transfer utility to support multiple protocols and sources including FTP, SFTP, and AWS, enhancing data ingestion capabilities for the platform.
- Mentored and onboarded a new developer, providing technical guidance and support to accelerate their productivity.
- Refactored legacy production code to align with updated architectural standards, improving code quality and maintainability.

Xceed Technologies (Acquired by Anite Plc.) | Chantilly, VA | Jun 2013 – Oct 2014

Rule Developer

- Developed and deployed business rules and C# scripts for network testing and measurement reports on a proprietary C# platform.
- Played a key role in pre-sales activities by developing custom rules and demonstrating product capabilities for sales demos, contributing to new business acquisition.
- Systematically debugged and tested production rules to resolve issues and ensure the accuracy of customer-facing reports.

**Education**

University of Maryland, Baltimore County | Baltimore, MD

Bachelor of Science in Computer Engineering | Dec 2012
